Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 1 and 3, drawn to nucleic acids comprising SEQ ID NO: 1, classified in class 536, subclass 23.1.
- II. Claims 2, drawn to polypeptides, classified in class 530, subclass 350.

2. The inventions are distinct, each from the other, because of the following reasons: Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions represent a different chemical species, namely nucleotide polymers as opposed to polypeptide polymers, and have different effects.

3. Applicant is not in compliance with the sequence requirements as set forth in 37 CFR 1.82-1.85 (claim 2 specifically needs a Sequence Identifier). See 37 CFR 1.821-1.825 and MPEP §§ 2421-2431. The requirement for a sequence listing applies to all sequences disclosed in a given application, whether the sequences are claimed or not. See MPEP § 2421.02.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different

classification, their recognized divergent subject matter, and their requiring different searches, restriction for examination purposes as indicated is proper.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
